President's Letter – Tom K3AJ

Gene Zimmerman W3ZZ Is Inducted in to CQ Contest Hall of Fame

For those who may have missed this news, on Thursday, May 14 PVRC legend Gene Zimmerman, W3ZZ (SK) was inducted into the CQ Contest Hall of Fame. I had the honor of speaking in his memory and in appreciation for Gene's contributions to amateur radio and contesting during the on-line induction following Contest University 2020. For those of you who missed this event and might want to hear more about Gene, his induction is recorded [here](#). Skip to 9:29:30 as this is a recording of the entirety of Contest University 2020.

I would like to acknowledge the driving force behind shepherding Gene's nomination through the process over a two-year period – PVRC Vice President Jay Horman W3MMM. Without Jay's hard work and tenaciousness this would not have happened. I am also grateful for the advice and input provided by Bernie W3UR and CQ Contest Hall of Fame members Frank W3LPL and Fred K3ZO, who were especially helpful in creating the presentation.

For those who may have never had a chance to meet Gene, his personality and impact on others was summed up admirably by quotes from two members of the CQ Contest Hall of Fame:

"Amateur Radio has had its share of characters but none were more colorful or more widely respected than Dr. Gene Zimmerman, W3ZZ -- a man who in one breath could identify the source of the world's greatest hot dogs, explain once-in-a-lifetime propagation and recount the history of contesting and contestants." – Ward, N0AX

"Gene developed a reputation as a great talker, but he was also a careful and sympathetic listener. He had a special quality of treating everyone he met as somebody who was worth knowing and deserving of respect, no matter their station in life. And he made it a point to discuss something that his interlocutors were really interested in. In that way he endeared himself to everybody with whom he came in contact." – Fred, K3ZO

In addition to his contributions to amateur radio, Dr. Gene Zimmerman PhD was also a giant in his professional field of virology and immunology though a long career at the National Institutes of Health. Can you imagine how great it would be to hear Gene's take on the current Covid-19 pandemic?

Oh, and before I sign for this month – we are looking forward to a big turnout in the upcoming PVRC Reunion. Tim, N3QE provides all the details later in this month's Newsletter. I would especially encourage everyone to make some noise on SSB during the periods where it is emphasized. Don't just tune around – smash down on that foot switch and call CQ!

73 and Go PVRC! - Tom K3AJ

PVRC Officers:

President: K3AJ Tom Valenti
Vice President: N4GU Mike Barts
Vice President: W3MMM Jay Horman
Secretary: N3QE Tim Shoppa
Treasurer: K2YWE Dan Zeitlin

Trustees:

K3MM, N3OC, K2AV, K4ZA, W3LPL, N4MM, N4ZR, W2RU, W3LL

PVRC Charter Members (all SK):

W3GRF, W4AAV, W4KFC, N0FFZ, W4LUE, W7YS, VP2VI/W0DX, W3IKN, W4KFT

2019 PVRC Reunion Results – Tim N3QE

Whether we are in-circle or out-of-circle, every year in June, we celebrate PVRC's heritage through the PVRC On-The-Air Reunion!

As Zory KB3VQC observes "Lots of fun, and lots of noise on all bands!". Many other members noted the QRM that decided to join the reunion too! Rob K4OV made a special effort. He notes "I really enjoyed this. I pulled out the two Kenwood TS-850S radios that I was using when I joined PVRC in 2004. I forgot what nice radios they are. It was fun to remember all the controls and feel a little muscle memory come back." Buddy W4YE calls out "Great to work my Brother W4AGI (K4CAX) PVRC 1958 and W3KC (W3VOS) PVRC 1954. We all early teenagers when we joined."

We even had several non-members get on the air and make a substantial number of QSO's - notably John K4BAI, who made a whopping 68 QSO's with PVRCers over the two nights of the reunion. Congratulations to John - only 4 PVRCers made more member QSO's than K4BAI did!

Being contestants, we kept a score! Each member we worked on each band and mode was worth one point. See below for score summary. Calls with asterisks note non-members who worked a bunch of PVRCers and who submitted logs.

Congrats to Jim N3JT, for working the most members on the most bands in the 2019 Reunion! (N3QE as organizer counts only as a checklog). Everyone who submitted a log will be receiving a PDF certificate by email, and the top 5 scores will be getting "PVRC Reunion 2019" buttons. Thanks to everyone who got on the air for the reunion fun!

Call	Score	Call	Score	Call	Score
N3QE	96	W4EE	40	K2YWE	13
N3JT	80	KG3V	39	K0XP	12

		W4AGI	14	AB3CV	4

Don't forget: the 20201 PVRC Reunion is June 6th and 7th!

Contest Operation with a Gaming Mouse - Geoff NE3K

A few months ago, I purchased a ‘gaming mouse’ for use with my laptop computer. My initial thought was for use with online game platforms to control multi-key sequences with a macro programmed to a button on the mouse

Then, I thought about using it to integrate with contest logging software to control sending of messages, similar to using the function keys on the keyboard. With a little bit of time, and some arrangement in the control software for the mouse, I was able to program the function keys of the mouse to map to the standard function keys on the keyboard.

In this article, I will outline the process I followed for making this all work and share the results I found in the latest CQ WW WPX SSB Contest in March 2020.

Hardware Setup

A few years ago, after being a loyal Apple MacBookPro user, I took the plunge back into the world of the PC. My MacBookPro was starting to show its age and was no longer running well. MicroCenter sells many laptops, and I settled on a Dell Inspiron 7577 with a 15” screen. This laptop is marketed to ‘gamers’, and I have found it to be more than adequate for daily use. It is equipped off the shelf with an intel Core i7-7700HQ CPU @ 2.80Ghz, 4 Cores, with 8 logical processors, a 250GB nVMe SSD as the ‘System’ drive, as well as a 1TB Seagate Hard Drive that is set up as a ‘data’ drive. I have since swapped the 1TB HD out for a 2TB SSD. I upgraded the memory from 16GB to 32GB.

For the mouse, I use a Corsair Scimitar RGB Elite Optical MOBA/MMO Gaming Mouse. It has your standard right/left click buttons, a clickable center wheel, two more buttons on the top, and 12 buttons on the left side, all of which can be programmed to activate functions on the computer, using the iCue software that is included.

My rig is a Flex Radio 6300, with internal antenna tuner, running SmartSDR 3.1.8 control software. I use a Heathkit SB-1000 manual tune amplifier with an Ameritron ARB-704 to control the keying of the amp. All of this feeds into a 125’ long wire antenna from the peak of my roof to the tree across the parking area.

For headsets, I currently use a Heil ProSet Elite which is directly connected to the FlexRadio. I also have the option of using a Corsair HS70 Pro Wireless headset connected to the laptop, which I use to record voicing files for N1MM+, and can use as a radio headset with the Flex.

Corsair Scimitar RGB Elite Optical
MOBA/MMO Gaming Mouse

Flex Radio 6300 w/ATU, and
Heathkit SB-1000 Amplifier

Software Setup

For contesting software, I have used both Win-Test and N1MM+ software. I do like both, but it seems that N1MM+ doesn't have the learning curve initially that Win-Test does. So for now I am using all N1MM+.

For the SSB contests, 'Voicing' files are needed to transmit the exchange information. I used Audacity which is a free download on the internet. It records, equalizes, and removes dead space in the files automatically. While it is not required for contesting, it makes it quite useful when people are sleeping and you don't want to disturb them, as you only need to press the button on the mouse or keyboard. It would not be required for CW contesting.

First step is to create a profile for N1MM+ in the software. You can even link N1MM+ to the profile, so that when you run N1MM+, it automatically will select the correct profile for the mouse.

Next, you enter the 'Actions' pane of the software. Here you see the mouse, the function keys (F1-F24) in the bottom right panel, and then next to the mouse is a layout of the 12 side buttons of the mouse. Clicking on the number in the top panel selects the button on the mouse, and then you select the function key in the bottom panel that you want activated. Simply create a new 'Action' for each F# key you wish to use. You can even rename them in the panel under where it says 'Actions' on the left side to correspond with what it does in N1MM+

CQ WW WPX SSB 2020

My first foray into this type of control of N1MM+ was during CQ WW WPX SSB 2020. I wanted to be able to stay up past when the kids and wife went to bed, without disturbing them by having to talk on the radio. I set up 'Advanced Voicing' in N1MM+ which strings together audio files to make up the exchange for each contact. Putting this part of the experience together is beyond the scope of this article, but it was not difficult to do, only somewhat time consuming.

I tend to do better with S&P during contests due to the limitation of only one antenna, and not a very good one at that. But I did attempt, at least, to also get runs going for this contest. Which led to some interesting discoveries, at least for me, using this setup.

Overall, I found that using the mouse with my right hand and typing with only my left to be much easier during S&P than running. It seemed to me that it was somewhat predictable when things would be said during a S&P exchange, ie, I could catch the tail end of the previous Q and fill in some information, allowing me to use the buttons in order to control the radio. For my attempts at running, which were somewhat successful (worked HL0W on 20m Saturday morning) it didn't seem as easy or practical to do things this way. I felt like I wanted to have my hands ready on the keyboard at a moment's notice. It was still usable for some slower times when running, but when there are callers piling up, it was easier to just use the function keys on the keyboard.

Conclusions

For my type of operation in a contest, mostly S&P, this seems like a worthwhile endeavor. It is especially helpful, as I said, for the late night/early morning hours with the voicing files you provide to N1MM+. The mouse itself was about \$80 retail, and they are available at any Best Buy store, or online retailer. As always, YMMV.

“Sunspot Aurora Paralyzes Wires” in 1921 – John K3TN

On May 15th, 1921 people woke up to headlines like this one from the Los Angeles Times: “*Telegraph Service Prostrated, Comet Not to Blame.*”

May 1921 Geomagnetic Storm

SUNSPOT CREDITED WITH RAIL TIE-UP

New York Central Signal System Put Out of Service by Play of Northern Lights.

The sunspot which caused the brilliant aurora borealis on Saturday night and the worst electrical disturbance in memory on the telegraph systems was credited with an unprecedented thing at 7:04 o'clock yesterday morning, when the entire signal and switching system of the New York Central Railroad below 125th Street was put out of operation, followed by a fire in the control tower at Fifty-seventh Street and Park Avenue. This is the first time that a sunspot has been blamed for such a piece of mischief. From other accounts it appeared

SUNSPOT AURORA PARALYZES WIRES

Unprecedented Disturbance Is Attributed to Solar Manifestations.

BROADWAY LIGHTS DIMMED

Theatre Crowds Returning Home Amazed at the Brilliance of the Skies.

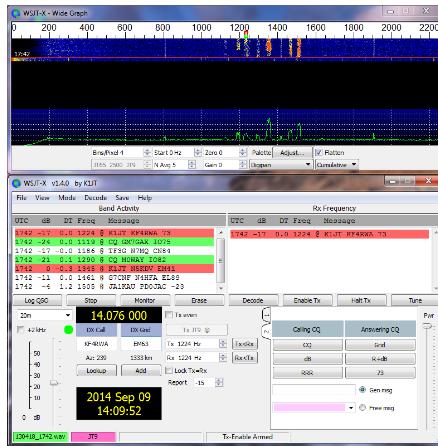

ELECTRIC DISTURBANCES AFFECT FRENCH WIRES

Aurora Not Visible, Its Absence Being Attributed to Atmospheric Conditions.

COPYRIGHT, 1921, BY THE NEW YORK TIMES COMPANY
BY WIRELESS TO THE NEW YORK TIMES.
PARIS, May 11.—The disturbance which interrupted telegraphic transmission in the United States last week has been making itself felt also in

Three days of coronal mass injections caused by giant sunspot AR184, crossing the sun during the declining phase of Solar Cycle 15 wreaked havoc on the world back when there was considerably less electric (let alone electronic) infrastructure upon which to wreak. Interesting article with details [here](#).

New Version of WSJT-X Software Released – John K3TN

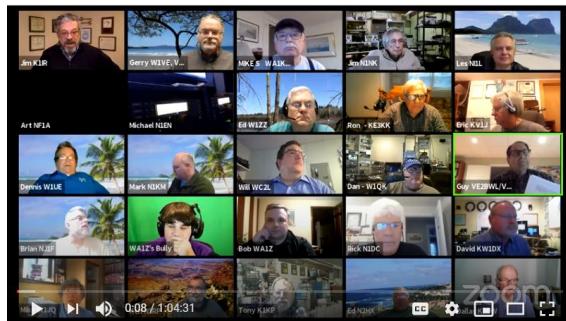

A new beta version of the WSJT-X software for FT8/FT4 and other modes is now available. It has several bug fixes and some decoding improvements. There will likely be a final update prior to the ARRL June VHF contest, so you can wait until the first week of June to update. Download from the development group website [here](#)

Remote Station Operating Hints and Kinks – John K3TN

Interest in remote station operation continues to grow. In PVRC, [Mike W4RN](#) has experience with just about every way of remotely controlling a station and is always willing to share his knowledge.

Gerry W1VE is the YCCC equivalent of W4RN. Gerry recently gave a Zoom talk on remote operating for YCCC and they have made it available [here](#).

One Really Strange Beverage – Alan WA3EKL

I want to share with you an experience I had building a short beverage recently but here is the background first. Due to the graciousness of my neighbors I have 4 beverages ranging from 285 to 478 feet long. The South beverage is 285 feet and hears very well into the Caribbean, Central America and South America and is amazingly directive. It is used on 160, 80 and 40 meters through a filter switching system that Frank, W3LPL, encouraged me to design and build.

The shortest beverage on my property is about 190 feet, looks East, and runs 6 foot off the ground along my 8-foot wooden fence across the back of my property. It was sensitive but poor on directivity. You are probably thinking: I guess so, Alan - it's too short. I agree so how do I make it longer **without** making it longer? Better said, how do I make it look longer to the approaching wave front without physically making it longer. That was my quest.

From the feed point the wire went vertical up the first fence post to a common screw in electric fence insulator, then over to the next fence post all the way to the end post where it dropped vertically the termination resistor. The termination resistor and the feed point matching transformer were in waterproof boxes. So, this is a standard beverage, 6 feet off the ground (which is sand a depth of 55 per the Anna Arundel County person who registers all the county wells,) and about 190 feet long, way too short!

As I searched the internet, I came across the site of [Slinky and Loaded Beverage Antennas](#) by W8JI. He was saying you could equally place certain amounts of inductance along the line to slow down the signal and make the line look longer. I then contacted Frank asking his advice about loaded beverages and he said I was on my own. He had not experimented with them.

My first attempt was to place a 2 ½ inch piece of PVC plastic pipe in the middle of the beverage with about 100 feet of # 12 wrapped around it. **Failure**. The second attempt was to place three coils of 2 ½ inch PVC wrapped with 50 feet of #12 each at the middle, and ½ way between the middle and the beginning and ½ way between the middle and the end. **Failure** again. In each case I had less sensitivity and no better directivity.

Then I had a brilliant idea, and this is what may help some of you all. How about if I put an additional screw in insulator at the same level as the top insulator on each post and another screw insulator about 4 ½ below the top two insulators. Now looking from left to right I could string the wire through the first top insulator, drop down the post, go through the bottom insulator, come back up the post, go through the second top insulator and over to the next post repeating the process all across all 23 posts. The total added length of added wire would be 23 x 9 or 207 feet. Therefore, total antenna length would be $207 + 190 = 397$ feet.

I felt really good. **It worked** and it worked super good. It had great sensitivity, but it did pick up more man-made noise. It had great directivity with one issue. It heard to the south 6dB better than my 285 foot South beverage and heard nothing to the East what so ever, total null. You remember this was supposed to be an Eastern beverage. Apparently, all those vertical elements spaced 8 feet apart added up in phase and made a great bidirectional antenna perpendicular to the plane of the antenna. So, think about

this. If one of you has a wooden fence pointing 90 degrees from where you want to here this could be a solution for you. Obviously, it wasn't for me!

My next configuration was to cut out the 9-foot sections of vertical drop and wind each section up on its own 2 ½ inch piece of PVC pipe. I then placed each coil between the two top insulators at the top of each post. To shorten the story here is the final configuration that yields the best performance.

From the matching transformer the wire goes vertical up the first fence post, then over **two** fence posts to the first coil, then through 19 more coils/fence posts, across **two** more fence posts and vertically down to the termination resistor. Total length of wire is now 370 feet. I found that whatever the distance is between your fence posts you need two of those distances horizontally on each end to get the best directivity. I would recommend that you Only wind up on each coil the length of wire that is the distance between two fence posts and keep the turns about 1/16 of an inch apart.

Next this antenna has a higher termination resistance than a normal beverage. It is more like 900 to 1.2K ohms. Therefore, you need to wind your own matching transformer. I used 2 turns on the primary that goes to the RG6 75-ohm coax and 7 turns on the secondary that goes to the antenna and ground on one of those binocular cores. I ended up with a 1.2K termination resistor. The matching transformer and termination resistor are important in this shortened loaded beverage in order to get the best sensitivity and directivity. This short beverage now hears well to the East, has good directivity and the man-made noise has disappeared.

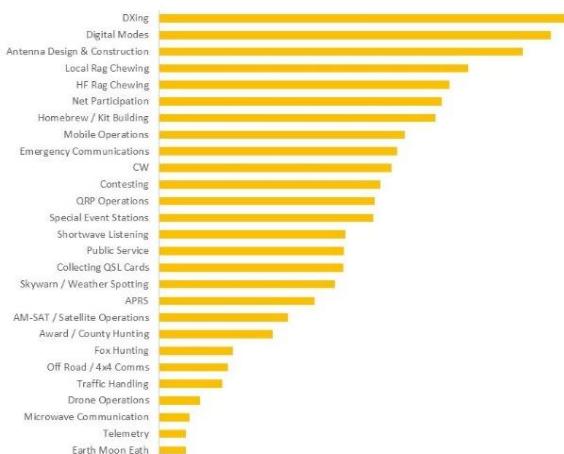

I hope this article will help some of you with limited yard space.

2020 State of the Hobby Survey – Dustin N8RMA

N8RMA has open up his 4th annual state of the hobby survey [here](#).

You can participate through June 12th. Last year there were close to 4000 respondents and some interesting results. Digital modes are the second most popular activity after DXing – another sign of FT8's rapid growth. Contesting beat out QRP operation but lagged behind Net Participation! We need more contestants to participate in the survey and beat the Pig Farmers in 2020!

What areas of radio do you enjoy?

PVRC DXCC Challenge Standings – Frank W3LPL

Below are the DXCC Challenge totals for PVRC members, transcribed from the ARRL DXCC [standings](#) data as of the 20th of each month or so. Thanks to Frank for the data each month to make this a regular feature. Please report any omissions or errors to [Frank](#).

Editor's Last Word – John K3TN

Thanks to Geoff NE3K, Tim N3QE, Frank W3LPL and Alan WA3EKL for contributions to this issue of the PVRC newsletter.

All signs point to many people getting interested in ham radio during the pandemic shutdowns and many hams getting interested in contesting - something like 3,000 signed up to view the Hamvention Content University sessions online (full session [here](#) or individual presentation [here](#)). Maybe in November we will see a lot more CK 20's in Sweepstakes – and it won't only be a few University club stations...

The quality and usefulness of the PVRC newsletter depends on contributions from members. If you have photos from club meetings, screen shots of new contest software, or brief writeups on station improvements or contest war stories, send them in any format to jpescatore at aol dot com.

From the PVRC Treasurer – Dan K2YWE

PVRC has chosen not to implement an annual dues requirement. We depend on the generosity of all our club members to finance our annual budget. In addition, active PVRC members are expected to participate and submit logs for at least two PVRC Club Competition contests per year.

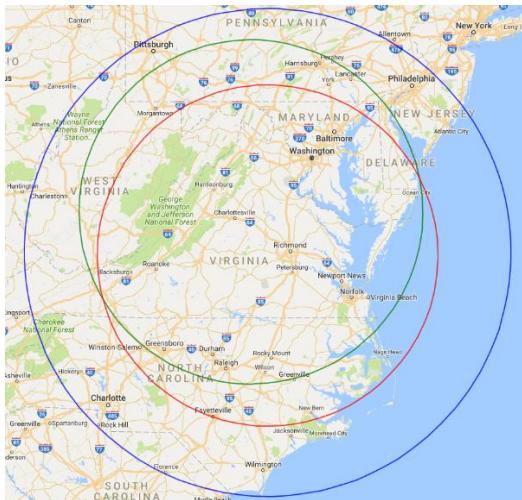

When contemplating your donation to PVRC, each member should consider the benefit you are receiving from PVRC and its many opportunities for your personal growth in our wonderful hobby, then donate accordingly.

Direct donations to PVRC via Credit Card or PayPal may be made by clicking this "Donate" button and clicking the next Donate button that appears on your screen:

Eyeball QSO Directions

The latest info on local club meetings and get togethers will always be sent out on the [PVRC reflector](#) and posted on the PVRC [web site](#).

Get Ready for Field Day—June 27-28!

Field Day Triplexer Combo

We've made it easy to work the 20, 15 and 10 meter bands with three different radios, using just a single tri-band antenna! Our Field Day Triplexer Combo includes Low Band Systems' (LBS) innovative 200W Triplexer (LBS-PB-TP200), LBS 20/15/10M band-pass filters, and coaxial cable jumpers. Eliminate the need (and cost) for extra antennas while enjoying fast setup and worry-free operation without RF interference.

DXEngineering@DXEngineering.com

Get everything you need to prep and install soldered or crimp-on connectors on your coax. Complete kits from DX Engineering include cable strippers, grippers, replacement blades, braid trimmers, cable shears and carrying case. Individual tools also sold separately.

Coaxial Cable Assemblies

These low-loss cable assemblies are available in standard lengths with DX Engineering's revolutionary patented PL-259 connector. Use the online Custom Cable Builder at DXEngineering.com to build assemblies made to your exact specs. DX Engineering's coaxial cable is also available by the foot or in bulk spools.

**Request Your New Catalog Today
at DXEngineering.com!**

Multi-Band Dipole Antenna Kits

Ideal for easy setup on Field Day, these rugged yet lightweight full legal limit rated antennas are usable to 30 MHz with a tuner balun (available separately). They feature strong and flexible 14 AWG stranded-copper, relaxed PVC-jacketed elements; 18 AWG 300-ohm ladder feedline; center-T support; and end mount brackets.

DXE-WA-070 Antenna, 70' Long for 40M and Up.....\$64.99
DXE-WA-135 Antenna, 135' Long for 80M and Up.....\$73.99
DXE-WA-260 Antenna, 260' Long for 160M and Up.....\$89.99

Free Standard Shipping for Orders Over \$99*.

If your order, before tax, is over 99 bucks, then you won't spend a dime on shipping. (Additional special handling fees may be incurred for Hazardous Materials, Truck Freight, International Orders, Next Day Air, Oversize Shipments, etc.).

Array Solutions

Your Source for Outstanding Radio Products

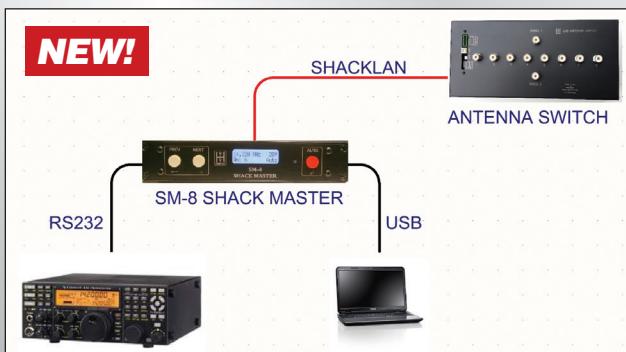

Professional Grade Equipment from Array Solutions

Hamation Station Automation

Hamation remote and Local Station Control products allow you to automatically or manually select antennas, bandpass filters, and control accessories. Accessories can be StackMatches, Antenna switches, antenna phasing systems, Stepper controller, turning radios on and off, etc. All of this can be done directly from the Ethernet as well!

Wiring are simple phone cables that daisy chains to all the devices. Wireless control is also available to your tower located switches. Call us to learn how to set up simple or complex systems. Below is a simple basic system that can switch antennas as you change bands. We can interface to any radio CAT port, not just RS232.

A more complex system could be a SO2R contest station as shown.

JK Antennas Are Now Sold by Array Solutions

High Quality HF Antennas for the Contest and DXER. We Focus on Quality and it Shows in Everything We Do. Call or email for antenna systems.

RatPack Remote Antenna Switch

Six antenna remote switch with rotary switch controller. Push button controllers available. HF and 50 MHz. Power rating 5 kW CW.

PowerMaster II

RF Power and SWR meter. Couplers for 3 kW, 10 kW or higher available for HF/6 m. VHF and UHF couplers for 1.5 kW. You can connect up to 5 couplers to the display to monitor RF power on different TX lines.

StackMatch

The original, not the imitations. For phasing 2, 3, 4 and even 6 antennas. Also it can be used to combine vertical and horizontal polarized antennas to diminish fading.

OM Power Amplifiers, The New RF Power Benchmark!

OM Power Amplifier Sales Program

Lower prices than the competition's equivalents, most modern design, and strongest warranty in the market!

The automatic amps can drive an antenna switch of up to 10 antennas and select up to ten bandpass filters applies to all automatic models

OM4000HF	Manual 160-10 m 4 kW
OM4000A	Automatic 160-10 m 4 kW
OM4000HF MARS	MARS and Commercial HF
OM2500HF	Manual 160-10 m 2.5 kW
OM2500A	Automatic 160-10 m 2.5 kW
OM2000+	Manual 160-6 m 2 kW
OM2000+ MARS	MARS and Commercial HF
OM2000A+	Automatic 160-6 m 2 kW
OM10C Combiner	Combiner for two OM amplifiers
OM10C 4000HF MARS	Two OM4000HF manual tuned amps and combiner package
OM10C 4000A MARS	Two OM4000A automatic tuned amps and combiner package

OM4000A - OM4000HF OM2500A - OM2500HF

The A-series are automatic band change amplifiers.

The HF-series are manual band change and tuning amplifiers.

OM4000: 4 kW SSB and CW, 3 kW RTTY, AM and FM

OM2500: 2.5 kW SSB and CW, 2 kW RTTY, AM and FM

OM2000A+ - OM2000+

The **OM2000A+** is the lightest and smallest 2000 W fully automatic HF/6 m power amplifier in the market. Its manual tuning version, the **OM2000+**, is our affordable unmatched best-seller.

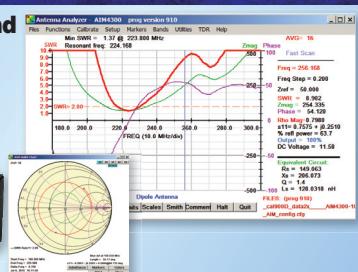

Frequency coverage:

Amateur bands 1.8 - 29.7 MHz including WARC + 50 MHz

Power output: 2000+ W in SSB/CW on HF bands, 1500 W in RTTY
1500 W CW/SSB on 50 MHz

Laboratory Grade Antenna and Vector Network Analyzers

One Port Analyzers and Two Port Vector Network Analyzers ranging from 5 kHz up to 1 GHz

AIM 4300 VNA UHF \$599
\$1,295

Surge Arrestors

AS-302, AS-303 Coaxial cable arrestors. DC to 500 MHz. N-type or SO-239 connectors.

AS-300SB Stacking fixture available.

AS-309H, ladder line arrestor.

All have static bleed function.

AS-8SP, AS-12SP and AS-16SP control cable arrestors.

Protect your rotator's and other control cables.

Baluns & RF Transformers

Ratios 1:1, 1:2, 2:1:4:1 and more. RF line isolators. Ratings 3, 5, 10 kW+. Get the most out of your antenna by stopping the coaxial cable from becoming part of it.

Check our Website for more new products!

Array Solutions' products are in use at top DX and Contest stations worldwide as well as commercial and governmental installations. We provide RF solutions to the DoD, FEMA, Emcomm, UN, WFO, FAA and the State Dept. for products and installation of antennas systems, antenna selection, filtering, switching and grounding. We also offer RF engineering and PE consulting services.

NOBODY BEATS AN HRO DEAL!

IC-9700 | All Mode Tri-Band Transceiver

- VHF/UHF/1.2GHz • Direct Sampling Now Enters the VHF/UHF Arena • 4.3" Touch Screen Color TFT LCD • Real-Time, High-Speed Spectrum Scope & Waterfall Display • Smooth Satellite Operation

IC-718 | HF Transceiver

- 160-10M** • 100W • 12V operation • Simple to use • CW Keyer Built-in • One touch band switching • Direct frequency input • VOX Built-in • Band stacking register • IF shift • 101 memories

ID-5100A Deluxe

VHF/UHF Dual Band Digital Transceiver

- Analog FM/D-Star DV Mode • SD Card Slot for Voice & Data Storage • 50W Output on VHF/UHF Bands • Integrated GPS Receiver • AM Airband Dualwatch

IC-7851 | HF/50MHz Transceiver

- 1.2kHz "Optimum" roofing filter • New local oscillator design • Improved phase noise • Improved spectrum scope • Dual scope function • Enhanced mouse operation for spectrum scope

IC-705 | HF/50/144/430 MHz All Mode Transceiver

- RF Direct Sampling • Real-Time Spectrum Scope and Waterfall Display • Large Color Touch Screen • Supports QRP/QRPp • Bluetooth® and Wireless LAN Built-in

ID-4100A | VHF/UHF Dual Band Digital Xcvr

- Compact, Detachable Controller for Flexible Installation • DV/FM Near Repeater Search Function • Apps for iOS™ and Android™ devices • Wireless Operation with VS-3 & UT-137 Bluetooth® Headset & Module • MicroSD Card Slot

IC-7700 | HF/50MHz Transceiver

- The Contester's Rig • HF + 6m operation • +40dBm ultra high intercept point • IF DSP, user defined filters • 200W output power full duty cycle • Digital voice recorder

IC-7100 | All Mode Transceiver

- HF/50/144/430/440 MHz Multi-band, Multi-mode, IF DSP • D-STAR DV Mode (Digital Voice + Data) • Intuitive Touch Screen Interface • Built-in RTTY Functions

IC-7610 | HF/50 MHz All Mode Transceiver

- Large 7-inch color display with high resolution real-time spectrum scope and waterfall • Independent direct sampling receivers capable of receiving two bands/two modes simultaneously

IC-2730A | VHF/UHF Dual Band Transceiver

- VHF/VHF, UHF/UHF simultaneous receive • 50 watts of output on VHF and UHF • Optional VS-3 Bluetooth® headset • Easy-to-See large white backlight LCD • Controller attachment to the main Unit

IC-7300 | HF/50MHz Transceiver

- RF Direct Sampling System • New "IP+" Function • Class Leading RMDR and Phase Noise Characteristics • 15 Discrete Band-Pass Filters • Built-In Automatic Antenna Tuner

IC-2300H | VHF FM Transceiver

- 65W RF Output Power • 4.5W Audio Output • MIL-STD 810 G Specifications • 207 alphanumeric Memory Channels • Built-in CTCSS/DTCS Encode/Decode • DMS

IC-R30 | Digital/Analog Wideband Xcvr

- 100 kHz to 3.3 GHz Super Wideband Coverage • P25 (Phase 1), NXDN, dPMRTM, D-STAR Mode • 2.3" Large LCD Display & Intuitive User Interface • MicroSD Card Slot for Voice & Data Storage • USB Charging & PC Connection

ID-51A PLUS2

VHF/UHF D-STAR Portable

- RS-MS1A, free download Android™ application • New modes for extended D-STAR coverage • Terminal Mode & Access Point Mode allow D-STAR operation through Internet • DV & FM repeater search function • Dplus reflector link commands

HAM RADIO OUTLET

WWW.HAMRADIO.COM

*FREE 1 OR 2 DAY DELIVERY TO MOST OF USA!

FTDX101MP | 200W HF/50MHz Transceiver

- Hybrid SDR Configuration • Unparalleled 70 dB Max. Attenuation VC-Tune • New Generation Scope Display 3DSS • ABI (Active Band Indicator) & MPVD (Multi-Purpose VFO Outer Dial) • PC Remote Control Software to Expand the Operating Range • Includes External Power With Matching Front Speaker

FT-891 | HF+50 MHz All Mode Mobile Transceiver

- Rugged Construction in an Ultra Compact Body • Stable 100 Watt Output with Efficient Dual Internal Fans • 32-Bit IF DSP Provides Effective and Optimized QRM Rejection • Large Dot Matrix LCD Display with Quick Spectrum Scope • USB Port Allows Connection to a PC with a Single Cable • CAT Control, PTT/RTTY Control

FTM-400XD | 2M/440 Mobile

- Color display-green, blue, orange, purple, gray • GPS/APRS • Packet 1200/9600 bd ready • Spectrum scope • Bluetooth • MicroSD slot • 500 memory per band

FTDX3000 | 100W HF + 6M Transceiver

- 100 Watt HF/6 Meters • Large and wide color LCD display • High Speed Spectrum Scope built-in • 32 bit high speed DSP /Down Conversion 1st IF

FTM-300DR | C4FM/FM 144/430MHz Dual Band

- 50W Reliable Output Power • Real Dual Band Operation (V+V, U+U, V+U, U+V) • 2-inch High-Res Full Color TFT Display • Band Scope • Built-in Bluetooth • WIRES-X Portable Digital Node/Fixed Node with HRI-200

FT-70DR | C4FM/FM 144/430MHz Xcvr

- System Fusion Compatible • Large Front Speaker delivers 700 mW of Loud Audio Output • Automatic Mode Select detects C4FM or Fm Analog and Switches Accordingly • Huge 1,105 Channel Memory Capacity • External DC Jack for DC Supply and Battery Charging

FT-991A | HF/VHF/UHF All Mode Transceiver

- Real-time Spectrum Scope with Automatic Scope Control • Multi-color waterfall display • State of the art 32-bit Digital Signal Processing System • 3kHz Roofing Filter for enhanced performance • 3.5 Inch Full Color TFT USB Capable • Internal Automatic Antenna Tuner • High Accuracy TCXO

FT-2980R | Heavy-Duty 80W 2M FM Transceiver

- Massive heatsink guarantees 80 watts of solid RF power • Loud 3 watts of audio output for noisy environments • Large 6 digit backlit LCD display for excellent visibility • 200 memory channels for serious users

FT-65R | 144/430 MHz Transceiver

- Compact Commercial Grade Rugged Design • Large Front Speaker Delivers 1W of Powerful Clear Audio • 5 Watts of Reliable RF Power Within a compact Body • 3.5-Hour Rapid Charger Included • Large White LED Flashlight, Alarm and Quick Home Channel Access

FTDX101D | HF + 6M Transceiver

- Narrow Band SDR & Direct Sampling SDR • Crystal Roofing Filters Phenomenal Multi-Signal Receiving Characteristics • Unparalleled - 70dB Maximum Attenuation VC-Tune • 15 Separate (HAM 10 + GEN 5) Powerful Band Pass Filters • New Generation Scope Displays 3-Dimensional Spectrum Stream

FTM-100DR | C4FM FDMA/FM 144/430 MHz Xcvr

- Power Packed System Fusion Transceiver • High Audio Output Power • Rugged Powerful Transmitter • Integrated 66ch High Sensitivity GPS • 1200/9600 APRS Data Communications

FT-60R | 2M/440 5W HT

- Wide receiver coverage • AM air band receive • 1000 memory channels w/alpha labels • Huge LCD display • Rugged die-cast, water resistant case • NOAA severe weather alert with alert scan

NOBODY BEATS AN HRO DEAL!

TS-990S | 200W HF + 6M Transceiver

- World's first dual TFT display • 200W output on all bands
- ±0.1ppm TCXO ensures both high stability and reduced power consumption • Triple 32-bit DSP's dedicated to main/sub receivers and band scope • Main receiver employs full down conversion, new mixer & narrow band roofing filters • Third order intercept point (IP3) +40dBm for highest level of RX performance (main receiver)

Call For Special Price!

TS-890S | HF/50MHz Transceiver

- Receive performance on a whole other level from narrow bandwidth roofing filters that only full down conversion can provide • CW Morse code decode/encode possible with stand-alone unit • 150dB Blocking dynamic range (BDR) • Expanded touch operation scope • Kenwood Sky Command® II Support • Remote operation achieved without host PC Direct remote-control function (KNS)

TS-590SG | HF/50MHz Transceiver

- Equipped with 500 Hz/2.7 kHz roofing filter as standard • ALC derived from TS-990S eliminating spike issues • Antenna output function (shared with DRV connector) • CW - morse code decoder function • Improved 1st mixer • New PFB key with multi-function knob • New split function enabling quick setting • LED backlight with selectable color tone

TM-D710G | 2M/440 Dualband

- V+V/U+U+U operation • Built-in GPS • Built-in TNC for APRS & DX-Cluster operation • 50W 2M & UHF • 1,000 memories • Dual receive • Green or amber backlight colors • Latest APRS firmware w/new features • Sky Command II remote functions

Call For Special Price!

TH-D72A

2M/440 HT w/extended RX

- 5W TX, RX 118-524 MHz, VxU, VxV, UxU • APRS w/built-in 1200/9600 TNC
- Built-in GPS, Built-in USB, digipeater
- Echolink® compatible
- Mil-Spec STD810

Call For Special Low Price!

TH-D74A

2M/220/440 HT w/D-STAR!

- D-STAR compatible • APRS ready w/built-in GPS • Color weather station information • Built-in KISS mode TNC • High-performance DSP voice processing
- Standard compatibility for Bluetooth

Call For Low Price!

TM-V71A | 2M/440 DualBand

- High RF output (50W) • Multiple Scan • Dual receive on same band (VxV, UxU) • Echolink® memory (auto dialer) • Echolink® Sysop mode for node terminal ops • Invertible front panel • Choice of green/amber for LCD panel • 104 code digital code squelch • "Five in One" programmable memory • 1000 multifunction memory

Call Now For Your Low Price!

TH-K20A | 2M Handheld

- 2M 5.5W • VOX • CTCSS/DCS/1750 Burst built-in • Weather alert

Call For Special Low Price!

TM-281A | 2M Mobile

- 65 Watt • 200 Memories • CTCSS/DCS • Mil-Std specs • Hi-quality audio
